TRUNK > SPACES = INFRASTRUCTURE / RESOURCES

BRANCHES > PROJECTS = INITIATIVES / INFLUENCING / INSPIRATION

# A community for people seeking a wiser world

Though living in societies which have never been so rich our sense of purpose and connection is often missing. A growing number of us are seeking lives that are meaningful as well as productive. yet we struggle to find a balance, finding ourselves trapped in conflict.

## From ancestral wisdom to digital wisdom

With Art / Earth / Tech we want to offer a way to combine wiser and weller ways of living whilst remaining engaged in conventional society

# Our approach

Our approach focuses on **fostering a community of people seeking a wiser world**. We do this by providing space, a network and knowledge. Space in the form of physical places that can act as homes for our community members to work, meet and stay. Space in the form of gatherings that bring the community together to reflect, learn and connect. Knowledge in the form of education and research to develop and share ideas, approaches and best practices.

A photograph of a field filled with red poppies and various green plants. In the background, there's a line of trees and a clear blue sky.

# What are the values we want to stand for?

**We are practical and natural.** We connect the ancient and the modern. Our interests range from nature to neuroscience, Dada to data.

**We seek harmony and balance:** art and techne, earth and spirit, science and wisdom, freedom and discipline, mindfulness and intention. **Our name reflects this commitment to a holistic approach.**

# Art

because it develops self-expression – our the fundamental need to express ourselves and to explore what it means to be human.

# Earth

because to understand the earth is to see oneself as part of something both greater and something whole. **To find respect the earth is to find respect for ourselves.**

# Tech

because our techniques and technologies delimit and create our present and future. Tech is both a question of developing our craft but also of shaping what we create.

Is there anything you want to take or contribute  
in Art / Earth / Tech?

Who in your network both personal and profes-  
sional could you put us in touch with?

Are there other things in your life which are en-  
lined with Art / Earth / Tech which you will be  
engaged in?
